

GLOBAL GROUP OF COMPANIES INC.

PRESS RELEASE

LICENSING AGREEMENT SIGNED FOR CANADA

TORONTO, Canada – February 1, 2006

ICC HealthNet Canada Inc. (ICCHN) has entered into a licensing agreement with **RX Sample Solutions Inc., North Carolina**, to jointly develop the alternative sampling market in Canada, with the ***Dispense as Patient Starter (DAPS™)*** programs.

ICCHN is a subsidiary of **ICC Global Group of Companies Inc.**, who are a Canadian based corporation and have international affiliates in London (UK), Miami, New York, Frankfurt, Dubai and Rome. Their other multi-faceted businesses include: insurance, real estate, import & export, natural resources, tax assistance programs, sports & entertainment management, and venture capital.

ICC HealthNet's core business is integrated health "**Care Centres**" that combine Family Medicine practitioners, specialists and diagnostic/ancillary services. From their 14 locations in Ontario, 4 in Alberta and 3 in B.C., ICCHN conduct over 900,000 patient visits to their Care Centres. Many of these facilities have either a major retail pharmacy provider or an independent dispensary attached to the Care Centre.

DAPS™ has a proven track record with over 15 pharmaceutical companies in the United States, conducting 50+ product programs. Improved patient compliance, pertinent market information from the patented voucher design and sequencing program, makes **DAPS™** an excellent alternative to the traditional pharmaceutical sampling programs.

ICC HealthNet will begin the launch of the **DAPS™** programs in Canada in March 2006, with key pharmaceutical companies, who will customize **DAPS™** to achieve their brand objectives of positive results in increased sales volumes and unequalled market data collection.
